Preface

As an addition to the European postgraduate training system for young neurosurgeons, we began to publish in 1974 this series of *Advances and Technical Standards in Neurosurgery* which was later sponsored by the European Association of Neurosurgical Societies.

This series was first discussed in 1972 at a combined meeting of the Italian and German Neurosurgical Societies in Taormina, the founding fathers of the series being Jean Brihaye, Bernard Pertuiset, Fritz Loew and Hugo Krayenbuhl. Thus were established the principles of European co-operation which have been born from the European spirit, flourished in the European Association, and have been associated throughout with this series.

The fact that the English language is now the international medium for communication at European scientific conferences is a great asset in terms of mutual understanding. Therefore we have decided to publish all contributions in English, regardless of the native language of the authors.

All contributions are submitted to the entire editorial board before publication of any volume for scrutiny and suggestions for revision.

Our series is not intended to compete with the publications of original scientific papers in other neurosurgical journals. Our intention is, rather, to present fields of neurosurgery and related areas in which important recent advances have been made. The contributions are written by specialists in the given fields and constitute the first part of each volume.

In the second part of each volume, we publish detailed descriptions of standard operative procedures and in depth reviews of established knowledge in all aspects of neurosurgery, furnished by experienced clinicians. This part is intended primarily to assist young neurosurgeons in their postgraduate training. However, we are convinced that it will also be useful to experienced, fully trained neurosurgeons.

We hope therefore that surgeons not only in Europe, but also throughout the world, will profit by this series of *Advances and Technical Standards in Neurosurgery*.

Technical Standards

Anatomy of the Orbit and its Surgical Approach. G. HAYEK, PH. MERCIER, and H. D. FOURNIER, Laboratory of Anatomy, Faculty of Medicine, University of Angers, Angers, France

Abstract	35
Introduction	36
Anatomy of the Orbit	36
The Orbital Cavity.....	36
The Orbital Fascia or Periorbita	38
Orbital Contents	39
Orbital Muscles	40
The Arteries of the Orbit	42
Veins of the Orbit.....	47
Nerves of the Orbit	48
Lacrimal Gland	55
Approach Routes to the Orbit	56
Incision.....	56
The Lateral Approach Route	57
Osteoplastic Techniques	58
Non-Osteoplastic Techniques.....	58
The Superior Approach Route.....	60
The Hybrid Lateral/Superior Route	63
Discussion	66
Conclusion	69
References	69

Neurosurgical Concepts and Approaches for Orbital Tumours. J. C. MARCHAL and T. CIVIT, Department of Neurosurgery, Hôpital Central, Nancy University Hospital, Nancy Cedex, France

Abstract	74
Introduction, Definition of Subject and Limitations.....	74
Historical Perspective	75
Aetiologies.....	76
Generalities	76
Main Orbital Tumours Occurring in Adulthood.....	77
Orbitosphenoidal Meningioma.....	77
Optic Sheath Meningioma	80
Cavernous Haemangioma.....	80
Schwannoma (Neurilemoma).....	81
Main Orbital Tumours Occurring in Children	81
Optic Nerve Glioma (ONG).....	81
Plexiform Neurofibromas	84

Orbital Vascular Lesions	86
Primitive Bone Tumours	87
Sarcomas	90
Leukaemia and Orbital Lymphoproliferative Disorders	92
Metastatic Tumours of the Orbit	92
Epidermoid Cysts (ECs)	93
Teratoma	93
Surgical Approaches	93
The Lateral Intra-Orbital Approach	97
The Optic Nerve Approach	99
The Sub Frontal and Intra Conical Approach of the Orbit	99
Gliomas of the Optic Nerve	103
Frontopterional Approach of the Orbit	105
Problems of Orbital Reconstruction	109
The Orbital Rim	110
The Orbital Walls	110
Orbital Dysplasia of the NF1	110
Surgery in the Case of Fibrous Dysplasia (FD)	112
Conclusions	113

Endoscopic Third Ventriculostomy in the Treatment of Hydrocephalus in Pediatric Patients. C. DI ROCCO¹, G. CINALLI², L. MASSIMI¹, P. SPENNATO², E. CIANCIULLI³, and G. TAMBURRINI¹, ¹Pediatric Neurosurgical Unit, Catholic University Medical School, Rome, Italy, ²Neuroendoscopy Unit, Department of Pediatric Neurosurgery, Santobono-Pausilipon Children's Hospital, Naples, Italy, ³Department of Pediatric Neuroradiology, Santobono-Pausilipon Children's Hospital, Naples, Italy

Abstract	121
Historical Background	121
Ventricular Anatomy	124
Preoperative Evaluation of Ventricular Anatomy	124
Neuroendoscopic Ventricular Anatomy	126
Anatomy of the Frontal Horn of the Lateral Ventricles and of the Foramen of Monro; Key-Points for Endoscopic Orientation	127
Anatomy and Endoscopic View of the Third Ventricle	127
Endoscopic Ventricular Anatomy Variations	129
Modern Neuroendoscopic Instrumentation	133
Optic Devices	133
Flexible Fiberscopes	133
Steerable Fiberscopes	135
Rigid Fiberscopes	140
Rigid Rod Lens Endoscopes	141

The Future: The Videoscope	145
Camera and Monitor	147
Illumination	149
Accessories (Irrigation, Holders)	149
Neuronavigation and Stereotaxy	150
Operative Instruments	152
Floor Perforation	152
Perforation With the Endoscope Itself	152
Monopolar or Bipolar Coagulation	152
Decq Forceps	154
Laser	155
Suction-Cutting (Grotenhuis) Device	157
“Semisharp” Instruments	157
Ultrasound Microprobes	157
Forceps and Scissors	157
Dilatation of the Stoma	158
Grasping or Biopsy Forceps	159
Fogarty Balloon	159
Double Balloon Catheter	159
The “Urological” Device	159
Decq Forceps	160
Opening of Lilliequist’s Membrane	160
Indications	161
Pure Obstructive Hydrocephalus	161
Aqueductal Stenosis	161
Primary Aqueductal Stenosis	162
Secondary Aqueductal Stenosis	162
Pathogenesis of Hydrocephalus in Patients With Aqueductal Stenosis	163
Analysis of Results of ETV in Patients With Primary and Secondary Aqueductal Stenosis	164
Hydrocephalus in Posterior Cranial Fossa Tumors	167
Pathogenesis	167
Management Strategies: The Role of ETV	167
Hydrocephalus With Possible Subarachnoid Spaces Impairment	168
Posthemorrhagic Hydrocephalus of Premature Infants	168
Pathogenesis	169
Results of ETV in Infants and Children With Posthemorrhagic Hydro- cephalus	170
Postinfectious Hydrocephalus	171
Pathogenesis	171
Results of ETV in Infants and Children With Postinfectious Hydroce- phalus	173
Hydrocephalus Associated with Dandy-Walker Syndrome	173
Pathogenesis	174
